RESEARCH STUDY FOR ALZHEIMER'S OR MEMORY LOSS

Do you miss
happier times
with your **loved one?**

Explore a **new option** while continuing
current Alzheimer's or memory
loss treatment.

NOURISH AD is a clinical research study
evaluating the safety and effectiveness of an
investigational drug for mild to moderate
Alzheimer's disease. Study volunteers will be
monitored closely by their study doctor.

Study volunteers must meet the following
criteria to enroll:

- Be between the ages of 66-90
- Have mild to moderate Alzheimer's
disease or memory loss
- Have a partner who can attend
study visits
- Other criteria apply

Compensation for travel may be available.
