

# CSSi Connect

A patient connected is a patient engaged!

CSSi designs customized portals for various audiences registering for clinical trials. This can be done through email or SMS (text). A variety of suggested application features include:

# APPLICATION FEATURES:

## APPOINTMENT REMINDERS

Reminders can be sent in advance for upcoming appointments.

## BLOGS

Blogs specific to the therapeutic area can be linked to the site. Blogs can often help patients and/or family members feel better connected while facing similar issues.

## CALENDAR

The homepage can display a calendar including study visits, events, and reminders.

## LOCAL ADVOCACY SUPPORT

Local organizations and support resources, such as toll free numbers and web addresses, are accessible to the patient relating to their condition.

## LOCAL EVENTS

Local events identified within the community that may interface with the patient and/or their families are displayed. This may include local fundraisers, health fairs, camps, book exhibits, and more.

## LOCAL SUPPORT GROUPS

Local support group information, such as meetings and group activities, can be provided to the patient relating to their condition in their specific location.

## MEDICATION REMINDERS

Automated medication schedule reminders distributed, timed with upcoming visits. Confirmation from the user requested.

## MESSAGES TO THE SITE

The patient may send a secure message directly to the site including study questions related to procedures and upcoming visits.

## CLINICAL TRIAL UPDATES

New, local or upcoming clinical trials displayed with provision to prescreen.

## PATIENT STUDY DIRECTORY

A contact directory which may include the study coordinator/investigator/emergency contact information and links to other relevant resources.

## STUDY VISIT DETAILS

An outline of all visits provided to the patient which can be timed with each scheduled visit. Information may include upcoming tests, assessments, dietary restrictions, and hyperlinks to definitions and other details.

## SURVEY TOOLS

Surveys can be distributed via IWR/IVR or SMS for collection of longitudinal data or provision of simple questionnaires with aggregate results displayed to the patient community.

## WEBINARS

Links to webinars and other media geared toward a specific clinical trial, relevant medical news and importance of participating in clinical trials for the advancement of medicine pertaining to their condition.
