

MyClinicalTrial ID

CSSi's **MyClinicalTrial ID** is unique in that it can be used during site identification and patient recruitment.

ID Sites for Studies - Allows Sponsors to assess validated patient counts, making qualified sites stand out during the feasibility process.

ID Patients to Recruit - Rapidly identifies eligible patients utilizing de-identified, real-time medical data compared against a protocol's I/E criteria. When paired with our Local Enrollment Specialist solution, this platform makes it easy and efficient for busy sites to accurately identify and recruit eligible patients.

Sites! Visit MyClinicalTrial.com/Profile to complete a questionnaire to join **MyClinicalTrial ID**.

MyClinicalTrial.com is an all-inclusive hub for *patients*, *sites* and *sponsors* to leverage real-time data to make informed decisions and expedite clinical trial completion.
